

RISHI RAJ

rishiraj23aiml@rnsit.ac.in | +91-7397234429 | [linkedin](#)

SUMMARY

Innovative Software Development Engineer skilled in programming languages, data structures, and algorithms. Solves complex problems with clean, efficient code and contributes to collaborative projects. Dedicated to continuous learning and developing scalable software solutions that drive organizational success.

SKILLS

- | | |
|---------------------------|----------------------------------|
| • ReactJS, JavaScript | • Data Structures, Algorithms |
| • HTML, CSS | • Machine Learning |
| • Python Programming, C++ | • Problem Solving, Communication |

EDUCATION

RNS Institute of Technology | Bengaluru | 2027

B.E.: Artificial Intelligence & Machine Learning | GPA: 8.16 / 10

KENDRIYA VIDYALAYA -DGQA | Chennai | 2023

12th: CBSE | GPA: 80 / 100

KENDRIYA VIDYALAYA -DGQA | Chennai | 2021

10th: CBSE | GPA: 94.60 / 100

PROJECTS

1) AI-Powered Skin Disease Detection System | *Python, PyTorch, Flask, Git*

- github.com/Rishi061205/Skin_ai
- Built a PyTorch deep learning model to classify 14 skin diseases from images.
- Developed a lightweight Flask REST API for instant prediction processing.
- Optimized model for fast local deployment with ~50ms response time per image.

2) High-Performance File Compression Tool | *C++, Data Structures, Algorithms*

- Created a fast file compression tool in C++ using the Huffman Coding algorithm.
- Built custom data structures (min-heaps, hash maps) from scratch for efficiency.
- Achieved ~40% average reduction in file sizes while maintaining data integrity.

3) AI-Powered Document Analysis Platform | *Angular, Spring Boot, Gemini API*

- Engineered a full-stack web app for document uploads and instant AI analysis.
- Integrated Gemini API for document summaries and interactive file Q&A.
- Designed REST APIs and secure SQL databases for user account and history management.
